

804 nm

10 kpc

This is a grayscale astronomical image showing a galaxy interaction. The image is labeled "804 nm" in the top left corner. It features a bright, elongated galaxy on the right side, which appears to be interacting with a more diffuse, irregular galaxy on the left. A long, thin filament of light extends from the bright galaxy towards the left. The background is dark with scattered stars. In the bottom right corner, there is a scale bar labeled "10 kpc".
